

Users.php

The screenshot displays a REST client interface with a dark theme. At the top, the breadcrumb navigation shows 'My Collection > Get data'. The main header includes 'Save' and 'Share' buttons. The request configuration bar shows a 'POST' method to the URL 'http://localhost/cinema_booking/api/users.php', with a 'Send' button. Below this, tabs for 'Docs', 'Params', 'Authorization', 'Headers', 'Body', 'Scripts', and 'Settings' are visible, with 'Body' currently selected. The 'Body' tab shows a JSON payload in 'raw' format:

```
1 {
2   "nama": "Andi Setiawan",
3   "email": "andisetiawan@example.com",
4   "password_hash": "passwordAndi123",
5   "no_hp": "08123456789"
6 }
```

 The bottom section shows the response details: '200 OK' with a status of 200, a response time of 324 ms, and a body size of 550 B. The 'Body' tab is selected, showing the JSON response:

```
1 {
2   "status": "success",
3   "message": "User created successfully",
4   "data": {
5     "user_id": "3"
6   }
7 }
```

Globals Vault Tools

Seats_availability.php

Pada modul ini, fungsi POST dan DELETE tidak diimplementasikan karena denah kursi dalam studio bersifat statis (sudah ditetapkan sejak awal). Penambahan atau penghapusan data kursi secara manual melalui API berisiko merusak integritas denah studio. Manajemen data kursi difokuskan pada fungsi PUT untuk melakukan update status kursi, guna menjamin konsistensi data dan mencegah terjadinya double booking.

Payments.php

Pada modul pembayaran, fitur DELETE sengaja ditiadakan untuk menjaga integritas data keuangan (audit trail).
